A1 =CHECK(YOUR_BUSINESS)

3 signs you've outgrown spreadsheets.

Spreadsheets are a great start. They're a poor place to stay.

B2 SIGN 1 OF 3

“Which file is the latest one?”

Two people, two versions, two different answers. Decisions get made on the wrong numbers.

Fix: One shared system, one version of the truth.

C3 SIGN 2 OF 3

Reports take days, not minutes.

Someone spends every month-end copying, pasting and checking, instead of doing their real job.

Fix: Reports that build themselves from live data.

D4 SIGN 3 OF 3

Only one person knows how it works.

When they are sick, busy or gone, the business stalls with them.

Fix: A system with the steps built in, so anyone trained can run it.

Spreadsheets start businesses.
Systems grow them.

We build systems around the way you already work.
